FUNCTIONAL CLASSIFICATION

Mr. Paukovitz stated that as a result of the 2010 Census, a number of activities needed to be accomplished by the MPO. He stated that the approval of the Urbanized Area and the Metropolitan Planning Area (MPA) have already been accomplished, and that the final step in the process was the approval of the Functional Classification changes required.

Mr. Paukovitz stated that the expansion of the Urbanized Area (particularly to include Manteno) involves the connection of the classified systems of the previous Urbanized Area and the system of the Village of Manteno. He further stated that some new rules for the interconnection with the rural classified system have involved some changes in current classification, and went through those changes.

Mr. Donovan stated that future federal transportation bills may result in the functional classification system only including the most highly classified roadways, but that those possibilities have not yet occurred.

Mr. Paukovitz requested that a smaller committee be appointed for immediate action on Functional Classification issue, with the recommendations being brought to the Technical Advisory and Policy Committees.

Mr. Tyson moved that the seven (7) revisions to the Functional Classification system (attached to these minutes) be approved, and that the Chairman of the Technical Advisory Committee designate a smaller group to deal with future Functional Classification issues when they arise.
