### WHAT?

All Rezoning, Special Use Permit and Variance applications (Variances as deemed necessary by the Planning Director) are now required to submit an Illinois Department of Natural Resources Ecological Compliance Assessment Tool (**EcoCAT**) results report at the time of filing the request.

### WHY?

This must be completed to comply with the Illinois Endangered Species Protection Act [520 ILCS 10/11 (b)] and the Illinois Natural Preservation Act [525 ILCS 30/17]. These laws require state agencies and units of local governments to consider the potential adverse effects of proposed actions on the Illinois endangered species and sites listed on the Illinois Natural Areas Inventory.

### HOW EcoCAT WORKS:

**EcoCAT** will provide a report to determine if your proposed action is in the vicinity of any protected natural resources. In 2006, IDNR implemented **EcoCAT**, an internet based system designed to facilitate the consultation process. **EcoCAT** uses databases, Geographical Information System mapping, and a set of programmed decision rules to determine if you proposed action may be in the vicinity of protected natural resources.

**EcoCAT** asks a series of General Information questions that you must answer to ensure that your project receives the appropriate review and is assigned to the correct staff member.

After completion of the inquiry you will receive a printer-friendly **EcoCAT** Results Report that either:

- Terminate consultation if no resources are in the vicinity; or
- Lists resources in the vicinity and identifies the staff member who will review the action. After review, staff will either:
  - Terminate consultation because adverse effects are unlikely;
  - Request additional information, or
  - Recommend methods to minimize potential adverse effects.

The report is then utilized by decision makers in assisting with the evaluation of the proposed project/request.

### HOW TO OBTAIN AN EcoCAT REPORT:

The report is offered through the Illinois Department of Natural Resources. You may request an EcoCAT report or find additional information about the process at the Illinois Department of Natural Resources website at <http://dnrecocat.state.il.us/ecopublic/>
